

**Patient:** John Doe  
**DOB:** 01/15/1965  
**MRN:** 123456  
**Date of Service:** 05/24/2025  
**Provider:** Alan Smith, MD

**Missing Notes for Claims Submission to United Healthcare:**

Service	Missing Notes
Stress Myocardial Perfusion Imaging (SPECT)	No documentation of prior authorization. Clinical notes do not explicitly highlight exertional or rest-induced ischemic symptoms that meet UHC high-risk criteria for nuclear imaging.
Transthoracic Echocardiogram	Lacks documentation correlating patient symptoms with guideline-driven indications for echo. Cardiovascular risk factors are mentioned but not linked to justification for imaging.
Coronary CT Angiography	Missing statement such as: <i>"Coronary CT angiography is indicated due to equivocal stress test results and ongoing clinical suspicion for CAD despite non-diagnostic noninvasive findings."</i> This clarifies conditional dependency and supports necessity under UHC guidelines.

**General Recommendations for Successful Claim Submission:**

- Ensure thorough documentation aligned with United Healthcare's clinical guidelines.
- Include detailed patient history, risk factors, and explicit clinical justification for each test.
- Reference specific coverage criteria from United Healthcare policies to strengthen the claim.
